

Mushroom ended stetoclip & earmould listening cup

Mushroom ended stetoclip & earmould listening cup

Part No. 22879M

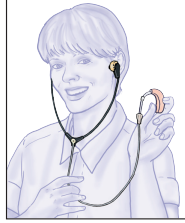

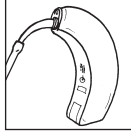

The stetoclip is used to listen to the hearing aid:

a) through the earmould

b) pull off end cup and attach direct to earhook

Good hygiene is important – we advise cleaning the ear tip end with a bactericidal cleaning tissue after use. One cleaning wipe is enclosed, further supplies are available from Connevens.

Pack of 50 sachets MRONTTIS
Tub of 40 wipes MRONTW40
Drum of 100 wipes MRONTW100

Also see Connevens Catalogue, section 6 – Hearing Aid First Aid.

CAUTION Hearing aids which are appropriate for the user's condition can cause damage to normal hearing. When using a stetoclip, an acoustic attenuator should always be used to avoid the risk damaging your own hearing.

Connevens Limited
