Caring for your hearing aid

In order to get the best performance from a radio aid system, it is important to keep the hearing aid clean and dry. A little time and effort spent on simple maintenance can ensure optimum listening quality.

Technology moves fast – even more shoes technology moves fast – even more shoes are now available online at DeafEquipment.co.uk.

With the constant development of new hearing aids, direct input shoes are an ever-changing range. Our website is regularly updated with details of newly available shoes.

In addition to the models shown here, Connevans also has stocks of many other manufacturers and non current hearing aids.

If you can’t find a shoe for the hearing aid you’re looking for here, try looking online! Use ‘Search the Site’ to find the correct shoe for the aid - fill in the make or model of your hearing aid in the ‘Search the Site’ box.

Listening to hearing aids

Open fit listener

Allows you to listen to a lower power, open fit hearing aid – it amplifies the sound of the aid so that it can easily be heard.

Professional hearing aid listener

Comfortable, high-quality and robust – a recommended choice for those on the deaf.

Connevans Guide to Hearing Aid Shoes

Some hearing aids have a direct connection facility, usually referred to as direct input. This facility allows the direct connection of the hearing aid to other audio equipment via a connector usually referred to as a shoe; thus the name ‘hearing aid direct input shoe’.

Connevans is able to provide, usually from stock, a wide range of hearing aid direct input shoes; many customers find the number of options overwhelming.

We show all the shoes here from the two most common paediatric manufacturers, Oticon and Phonak, however we are still able to supply shoes from all manufacturers. The pictures here are shown life size (as close as possible) so you can put your shoe against the page and identify most the shoes without difficulty, making re-ordering easier for you and us! Please keep in mind that many hearing aid models have very similar names, but require different shoes. For example, there are direct shoes for the Phonak Naída UP* and the Phonak Naída SP. If you require further help, please do phone our radio aid helpline for assistance when ordering.

Please note that although Connevans is, has two shoes in the picture to give different views, the shoes are all sold as singles.

New wide range of Phonak colours available! All Connevans’ lines of Phonak shoes are now available in a very wide choice of colours to match the colour of the aid.

We don’t have room for them all here, but to view the full range for each product, please visit our website: www.DeafEquipment.co.uk.

Oticon

To listen to music with Oticon hearing aids, we recommend using an infrared direct input lead.

These are available in black and white, in a variety of lengths.

See page 205 in your Connevans Catalogue Issue 52 for part numbers and prices.

PHONAK life is on

To listen to music with Phonak hearing aids, we recommend using a personal stereo direct input lead, easily identified by its blue plug!

These are available in black and white, in a variety of lengths.

See page 205 in your Connevans Catalogue Issue 52 for part numbers and prices.

Connevans

Established 1961

Equipment for deaf and hard of hearing people in education, employment, the home & leisure

Wide range of Phonak colours available! All Connevans’ lines of Phonak shoes are now available in a very wide choice of colours to match the colour of the aid.

We don’t have room for them all here, but to view the full range for each product, please visit our website: www.DeafEquipment.co.uk.

Did you know there’s a world of technology available for deaf young people?

### Solutions for Home & Leisure

**Wireless hearing aid accessories**
- Music: Listening for pleasure
- Personal Pagers: The latest technology for getting the most
- Smoke alarms: Would you be safe if there was a fire at night?
- Mobile phones: Easy to use and amplified mobile phones
- Wireless hearing aid accessories
- Personal radio systems
- Doorbells
- TV & radio

**Solutions for School & Education**

**fmGenie radio aids**
- Robust and reliable
- The right technology can make a huge difference to deaf children and young people's education. Schools, colleges and universities are busy, noisy and sometimes acoustically unfriendly places. In improving access to speech and sounds across all learning environments, appropriate equipment can help ensure that pupils and students need to use less of their energy on listening and can focus much more on learning and understanding.

**Phonak Roger Pen radio aids**
- Highly discreet radio aid systems
- Phonak Roger radio aids incorporate the latest digital technology into smart and discreet solutions for all deaf people. For example, the Roger Pen is a flexible, multi-purpose transmitter ideal for use by teenage students and adult learners.

**Solutions for Home & Leisure**

**Personal Pagers**
- Portable & flexible
- A personal paging system can be used wherever somebody needs to summon assistance or help either as an emergency or as a routine basis.

**Hall soundfield systems**
- A Connevans Hall soundfield system provides great quality sound for assemblies, performances and parental evening.

**Induction loops**
- Induction loops for visitors
- Ensure equality act compliance
- You can help ensure good access for your children and other visitors who wear hearing aids with a loop system at reception. The loop can be either a rechargeable, portable unit or a permanently installed system.
