

Connevans and our building

Activities for our staff during breaks include jig-saw puzzles, table football, pool and darts competitions.

We have a bicycle storage rack and showers in the premises and we encourage staff to cycle, we also encourage staff to walk to work if practical (Angie walks 3 miles!)

We have a company library in the tea room, where staff can donate & read others favourite books

We actively encourage people to car share where practical and some come in by public transport. Bridge House is predictably very near the local train station!

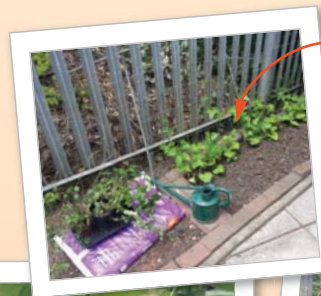

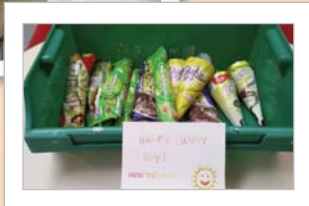

We have communal tea breaks which reduces energy used in boiling kettles and reduces waste. We also ensure we buy Rainforest Alliance Certified tea and coffee.

When Connevans moved to a new factory/warehouse in 2010, we generally moved closer to our staff homes and slightly further away from the Directors.

We're rather fond of tasty things at Connevans and we try to have little treats for the team throughout the year such as pancakes and hot cross buns in the spring and ice creams when it's hot

We have a small vegetable patch out the back of our building where we grow salad vegetables for our lunch

We have Master Power switches in each department which turns off all power sockets, ensuring that nothing is left turned on or in standby overnight and when not in use.
