

## Tinnitus

Tinnitus is a condition where you hear noises that aren't there, usually in the form of a whistling or in more extreme cases, as a roaring sound.

We all have tinnitus to some degree, but for the majority of us it doesn't cause a problem and we rarely even notice it. For some people their tinnitus is very loud and distracting, causing sleepless nights and stress.

Anyone wanting to find more information should contact the British Tinnitus Association on 0800 018 0527.

## Pillow Speakers

For use with radio, CD, MP3, iPod, sound relaxer etc.

Using a pillow speaker can help people with tinnitus gain relief when going to sleep by providing distracting sounds or relaxing background music. The sound pillows and pillow speakers may be used with an MP3 player or any sound source with a 3.5mm headphone socket.

Pillow speakers allow you to listen in privacy and comfort to your personal audio device at night without disturbing your partner.

Please note for hygiene reasons these products are excluded from the Connevens extended returns policy.

### Sound pillow

The sound pillow has built-in lightweight stereo speakers. Designed just for the user, the speakers are heard when resting your head on the pillow. The speakers don't affect the comfort of the pillow, in fact it's not easy to feel them even when you know where they are.

Materials: 50/50 polyester/cotton cover with 100% polyester filling. Not suitable for washing. Lead length: 200mm with 3.5mm stereo plug.

Product should not be used by children under the age of four.

### Standard sound pillow

Has two speakers and fits any standard sized pillow case. Size: 620 x 460mm

14PILLOW 		
Each	inc VAT	ex VAT
1-9	£ 29.04	£ 24.20
10+	£ 26.14	£ 21.78

### Small sound pillow – 180mm square

Small sound pillow with single speaker and pillow case. Can be used on it's own or placed inside a standard pillow. Ideal for use when travelling.

Size: 180 x 180mm

14PILLOWS 		
Each	inc VAT	ex VAT
1-9	£ 27.84	£ 23.20
10+	£ 25.06	£ 20.88

## Stereo Sound Pillow Insert

A small pair of pillow speakers in a fabric insert designed to tuck neatly into a standard pillow. The advantage of this product is that you can get full stereo sound, unlike single pillow speakers.

Please note: the insert can be wiped clean with a damp cloth but must not be washed or immersed in water. Size: 450 x 75 x 25mm. Lead length: 2m. Weight: 95g

14PILL2 		
Each	inc VAT	ex VAT
1-9	£ 28.80	£ 24.00
10+	£ 25.98	£ 21.60

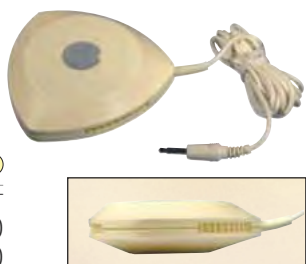

## Pillow Speaker

This mono small pillow speaker simply slips in your pillowcase to allow you to listen in privacy. The speaker is not loud so it needs a powerful radio, CD etc. sound source with a **mono** 3.5mm headphone socket.

Evaluation panel view: this speaker is not as comfortable as one of the sound pillows, but it is a lower price.

Speaker diameter: 85mm. Lead length: 180mm with a 3.5mm mono jack plug

14PILSPK1 		
Each	inc VAT	ex VAT
1-9	£ 14.40	£ 12.00
10-49	£ 12.96	£ 10.80
50+	£ 11.52	£ 9.60

## Sound Oasis Sleep Therapy Pillow Speakers

A pair of small but substantial stereo pillow speakers with handy in-line volume control. They are wired together so you don't lose one (!) but you are still able to arrange them comfortably under your pillow.

Evaluation panel view: great for use with the Sound Oasis sound relaxers and stereo devices such as an iPod.

Speaker diameter: 63mm. Lead length: 820mm with a 3.5mm stereo jack plug.

## Sound Relaxers

These products can help relieve the symptoms of tinnitus through relaxation or distraction. They all offer a range of sounds to create a soothing sound environment. Distracting yourself with these calming sounds helps block out the irritating noises of tinnitus. They also work really well in creating a soothing background ambience for restless babies.

 To listen to a selection of sounds from these Sound Relaxers or for more information about each product, please visit [www.DeafEquipment.co.uk](http://www.DeafEquipment.co.uk)

The **Sound Oasis Style S-650** is a compact and stylish sound therapy system with a choice of 12 high quality sounds plus the option to purchase additional sound cards. It has a built-in alarm clock which will wake you with either a buzzer or any of the sounds on your current sound card.

It has a sleep timer with sleep enhancement technology which will gradually slow sounds before fading out after 30, 60 or 90 mins to gently lull you to sleep. There is also a useful 'Resume' feature which will allow you to repeat your last played sound at the same volume and timer setting.

*In the opinion of our evaluation panel, the Sound Oasis Style does not match the advanced features and volume levels of the Sound Oasis Deluxe S-5000, but makes a nice sound relaxer. It has a modern look and the built-in alarm clock is a useful feature.*

The **Sound Oasis Classic S-550** is an excellent sound therapy system and has a choice of 6 high quality sounds plus the option to purchase additional sound cards. Very simple to use, the S-550 Classic is similar to the S-650 Style but without the alarm clock function & digital display.

*In the opinion of our evaluation panel, the Sound Oasis Classic is a really nice basic sound relaxer, the simplest of the Sound Oasis range. Offering good value-for-money, the S-550 is an attractive alternative to the popular Wellcare.*

The **Sound Oasis Travel S-850** is a portable sound therapy system with a choice of 19 high fidelity sounds. The built-in alarm clock has two time zones and the unit is supplied with a protective pouch – it even has a keylock to secure it, making it ideal for use while travelling.

It has a large clear digital display, snooze button and rotary volume control. There is the option of recording your own 15 minute voice memo and you can wake up to your chosen alarm sound, memo or buzzer; or use the sleep timer which gently fades the sound over your chosen time.

*In the opinion of our evaluation panel, the Travel Sound Oasis is an attractive and practical sound conditioner, with lots of nice features and a good range of sound options.*

The **Wellcare Tinnitus Sound Relaxer** is a compact and value-for-money sound relaxer with a choice of 7 naturecare sounds and a 30 min sleep timer. It is battery powered, but a UK mains power supply can be purchased separately.

*In the opinion of our evaluation panel the Wellcare offers basic features and is very easy to use – it would make a simple introduction to this type of product.*

Sound Oasis Deluxe S-5000

Sound Oasis Bluetooth Sleep Sound BST-100

### Sound Relaxers— continued

The **Sound Oasis Deluxe S-5000** is our top-of-the range sound therapy system with a choice of 24 high fidelity sounds plus 5 auxiliary mix sounds and 1 recordable sound which allows for 145 sound options! It also has advanced features including an AM/FM dual clock radio alarm, a nap timer and treble/bass adjustment.

It offers the widest choice of soothing sounds and gives the user flexibility to customise these sounds to their personal requirements. The 3 built-in speakers give a loud high quality sound, with the advantage of an effective treble and bass control.

*In the opinion of our evaluation panel, the advanced features of the Sound Oasis Deluxe S-5000 are well worth the extra money. Although it is physically larger than the rest of the range, this gives a really nice sound quality and has an excellent choice of available sounds.*

The **Sound Oasis Bluetooth Sleep Sound BST-100** is an easily portable, stylish speaker with 10 built-in sounds. Alternatively, you can connect the speaker to a mobile phone or tablet and stream sounds wirelessly over Bluetooth or connect in via an audio cable. A unique feature of this product is that it will act also as a handsfree speakerphone when connected by Bluetooth to a mobile phone.

*In the view of our evaluation panel, the BST-100 Sound Oasis Sleep Sound speaker has excellent sound quality for its size, even when listening to music. The built-in sounds are nice and we particularly like the wireless streaming feature.*

## White Noise Generators

### Sound Oasis White Noise Machine

The S-100 White Noise Machine from Sound Oasis is neat, portable and offers 10 white noise sounds.

The sounds are seamless and non-looped and, unusually for white noise generators, there is a choice of tracks which allows you to choose the tone which suits you best. There is also the option to plug in your iPod/MP3 player and play your music instead. A timer function allows you to set the sound to turn off after 30, 60 or 90 mins.

*In the opinion of our evaluation panel, this product is the most advanced white noise machine we've seen. Easy to use and attractive, with a range of white noise tones.*

Mains powered by USB travel power supply with changeable plugs for UK, EU & US giving worldwide usage.

Size: 110 x 120 x 60mm. Weight: 238g.

### Marpac dohm Sleepmate

This 'white noise' sound conditioner effectively masks unwanted noises by creating a constant, smooth sound of rushing air, similar to the sound of a vacuum cleaner or a hairdryer. This soothing sound creates a sense of calm, making it easier to concentrate, relax and sleep.

The Marpac dohm is an easy to use product which is good at helping to relieve the distracting symptoms of tinnitus. There are two speeds and the tone and volume of the sound are controlled by simply twisting the top. Electrical consumption is relatively minimal making it energy efficient and economical.

*Our evaluation panel recommended the Marpac as a good simple sound masker, useful for masking sounds such as street noise and traffic as well as tinnitus.*

Size: 146mm base diameter x 83mm high. Weight: 730g.

Mains powered UK plug 230v ac 50Hz.
